Basetrac® Plate road plate

Innovation thanks to Neolaminate®

Robust, sustainable and versatile: the extremely lightweight road plate with unique fibre reinforcement can withstand the harshest conditions while protection the environment.

Neolaminate fibre reinforcement

for increased structural integrity and load-bearing capacity with minimal dead weight

100% recycled plastic core*

for a resource-conserving future

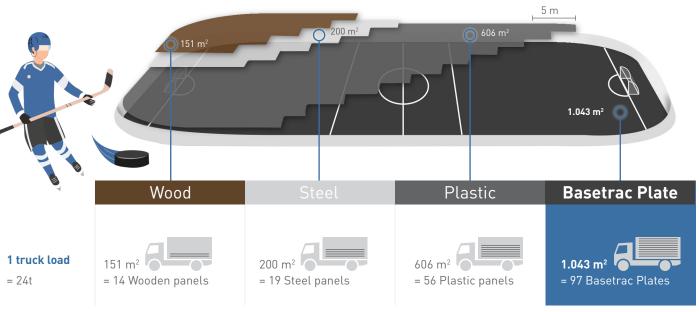

Upper and lower protective layer*

for maximum load capacity and safety on any surface

*all plastic layers are 100% recycled

Maximum area coverage with minimum effort

Basetrac Plate can cover 1,043 m² with just one truck load -the size of an ice hockey field - with just one truck load, maximising efficiency in transportation and logistics.

*For standardized panel size: 6,000 x 1,800 mm

Powerful in use, with minimal weight!

Simple and time-saving handling on site

Less CO₂ and tyre abrasion thanks to reduced transport

Noticeable cost savings through efficient logistics

100% recycled and fully recyclable
